### **Tipologization of regions of the Far East on the level of development of social infrastructure**

*Evaluation of the level of development of social infrastructure in the Far East is presented in this article. The variety of approaches to a concept of social infrastructure is described, the author's approach to its definition is proved. Evaluation of the level of development of the social infrastructure is carried out by the method of tipologization of the regions on an initial condition and dynamics of a certain indicator, developed within the theoretical statistics. This method allows monitor the change of the studied parameters not only in time, but also in comparison with the indicators of the other regions. In this article the detailed description of method is given, the choice of indicators for the analysis is proved. The results of tipologization of subjects of the Far East presented in the article in the sphere section "Education", spheres "Health care" and the housing-and-municipal sphere allow the author draw a conclusion that during the period from 2009 to 2017 social infrastructure of the Far East didn't gain the advancing development against the background of the average Russian dynamics.*

**Keywords:** social infrastructure, tipologization of regions, spheres "Education", "Health care", housing-and-municipal sphere, subjects of the Far-Eastern Federal District.
