

Tatyana V. Mazankova – Candidate of Economics, Associate Professor, the chair of management and business law, the Far-Eastern institute of management – branch of RANEPa (33, Muravyev-Amurskiy Str., Khabarovsk, 680000, Russia). E-mail: mazankova-tv@ranepa.ru

Service employment assessment

The author assessed the employment of labor resources in the important activities for maintaining the standard of living, such as wholesale and retail trade, repair of motor vehicles and motorcycles, hotel and restaurant business. The calculations were carried out on the basis of official statistical data. The author studied the dynamics and structure of employees in the formal and informal sectors of the economy, the gender and age structure, the level of education of employees, the place of main work, work experience, and the length of the working week. The results of the analysis of labor resources allow us to formulate qualitative requirements for the level of education of labor resources and for the system of vocational education in the region that provides training.

Keywords: employment, trade, public catering, employment in the formal and informal sectors, vocational education, working week duration.
