## **Mechanisms equalization of the living standards the population of the Far East and Siberia**

*The article sets out a mechanisms equalization of the living standards the population of the Far East and Siberia regions in comparison with the others Russian regions. The authors give examples of climatic and geographical northern price increases. They propose administrative measures to compensate the state budget for the northern increase in the price of products from the northern regions. These measures will lead to the competitiveness of Northern enterprises in the markets of Russia and the global world.*

**Keywords:** *Russian regions, mechanisms, resources of economic growth and quality of life in the North.*
