Creative aspect of regional development in the Message of the President of the Russian Federation

The article contains an expert opinion on regional development issues reflected in the Message of the President of the Russian Federation of 2021 (hereinafter – the Message). It is noted that the issues of regional development in the Message correspond to the logic of the principles of coordinated functioning and interaction of the bodies included in the public power system. It has been shown that along with social measures, the key idea of the Message is the economic development of the regions. The prerequisites and setting of regional development goals within the framework of the new regional support scheme proposed in the Message are revealed. The regional block of instructions for implementation of the Message is presented, the implementation of which will ensure the fulfillment of the role of the Message as a document of spatial development and equality of opportunities for the different territories and population groups.

Keywords: regional development, the Message of the President of the Russian Federation, measures to support the regions.
