**Abstract.** *The article examines the role of the administrative burden of public administration on the investment climate in the constituent entities of the Russian Federation. Particular attention has been paid to the analysis of the results of the National Rating of the Investment Climate in the framework of its two main stages: the positions of the Far Eastern regions in the rating have been assessed for the period of 2015–2020 and 2021–2024, the regions that fulfilled the task of entering the top 30 of the National Rating have been identified: the Sakha Republic (Yakutia), the Amur Region, the Kamchatka Territory and the Sakhalin Region. As of 2024, the top positions in the district are occupied by the Sakhalin Region and the Magadan Territory, at the end of the rating – the Chukotka Autonomous Area and Jewish Autonomous Region. The subject analysis of the factor «administrative burden on business» of the National Rating of the Investment Climate in the constituent entities of the Russian Federation has been carried out. The article identifies the main problems of administrative pressure by state authorities on the development of the investment climate in the regions and defines the directions for the formation of calculation tools for assessing the activities of territorial control and supervisory bodies to ensure assistance in improving the investment climate in the regions of the Far East. The results of the study can be useful for state and municipal authorities that ensure the socio-economic development of the regions.*

**Keywords:** *public administration, investment climate, control and supervisory activities, improvement of control management, administrative pressure, socio-economic development*
